

Dark and Moody - Mystical Kitchen Still Life

von Dieter Meyer

Atmospheric food photos in mystic light style.

Moody food photos owe their atmosphere and expression to the use of little light and even more shadow. There are several terms for this type of photography: Dark and Moody, Mystic Light or also Chiaroscuro, an Italian term that originally comes from painting and means light dark. It stands for a strong light dark contrast like in the paintings of Caravaggio or Rembrandt, which creates an intense, often dramatic mood.
